

## **Course Description**

### **ARC2949 | Co-op Work Experience 2: ARC | 3.00 credits**

This is a course designed to continue training in a student's field of study through work experience. Students are graded on the basis of documentation of learning acquired as reported by student and employer. Students will be assigned specific course prefixes related to their academic major prior to registration. All students must contact the Co-operative Education Office to obtain registration approval. Prerequisite: 2.0 minimum GPA, approval of Co-op Program Director, and completion of ARC1949.

### **Course Competencies:**

**Competency 1:** The student will demonstrate the ability to effectively document and reflect on the learning acquired during their work experience in the field of architecture, as reported by both the student and the employer by:

1. Demonstrating effective documentation and reflection by the student and employer on the learning acquired during work experience in architecture
2. Articulating and presenting the knowledge acquired during work experience in design and architecture through effective documentation and reflection
3. Showcasing proficiency in documenting and reflecting on the learning acquired during co-op work experience

**Competency 2:** The student will integrate work experience into their field of study, applying theoretical knowledge to real-world scenarios in design and architecture and articulating the impact of this integration on their professional development by:

1. Integrating work experience into their field of study, applying theoretical knowledge to real-world scenarios, and articulating the impact of this integration on their professional development
2. Applying theoretical knowledge learned in design and architecture to real-world scenarios
3. Illustrating and reporting the impact of integrating work experience into their field of study and applying theoretical knowledge to real-world scenarios in design and architecture

**Competency 3:** The student will communicate and collaborate with their employer to gain a comprehensive understanding of the practical aspects of design and architecture, documenting and reporting their learning in a clear and concise manner by:

1. Effectively communicating and collaborating with their employer to gain a comprehensive understanding of the practical aspects of design and architecture
2. Demonstrating effective communication and collaboration with their employer to demonstrate, document, and report their learning in a clear and concise manner
3. Exemplifying the skills of their comprehensive understanding of the practical aspects of design and architecture and effectively documenting and reporting their learning

### **Learning Outcomes:**

- Communicate effectively using listening, speaking, reading, and writing skills
- Solve problems using critical and creative thinking and scientific reasoning
- Use computer and emerging technologies effectively
