## **Course Competency**

## CTS0035 Introduction to the "C" Program (2.50 credits)

## **Course Description**

An introductory course covering the syntax and rules of the "C" language. Students will learn the topics of program design, variables, output, flow control, and functions. Students are required to code and execute business applications. Special fee.

Course Competency	Learning Outcomes
<b>Competency 1:</b> demonstrate an understanding of the program development process	1. Computer / Technology Usage
<ol> <li>Writing pseudo-code for program development before writing the code.</li> <li>Applying the techniques of functional decomposition to break a programming design problem into smaller pieces.</li> <li>Incorporating adequate and meaningful comments into the source code of programming projects.</li> <li>Participating in a team to develop a solution to a problem.</li> <li>Testing and debugging programming logic and code.</li> </ol>	
<b>Competency 2:</b> demonstrate an understanding of mastery of basic C++ fundamental data types and operators	<ol> <li>Computer / Technology Usage</li> <li>Information Literacy</li> </ol>
<ol> <li>Using all the data types (float points, integers, long, double, boolean, characters, and strings) available in C++ for programming assignments.</li> <li>Using descriptive and meaningful names in programming assignments.</li> <li>Creating programs that use casting of data types.</li> <li>Creating programs that use all existing operator(s) (+,-,*, %,/,=) available in C++.</li> </ol>	

<ol> <li>Explaining the properties of a variable such as its name, value, scope, persistence, and size.</li> </ol>	
<b>Competency 3:</b> demonstrate an understanding of conditional statements	<ol> <li>Computer / Technology Usage</li> <li>Information Literacy</li> </ol>
<ol> <li>Creating programs that use if, else if, and else statements to evaluate conditions.</li> <li>Creating a program that uses logical operators (and, not, or) in conditional statements.</li> <li>Creating a program that uses comparison operators (==, &lt;, &gt;, &lt;=, &gt;=) in conditional statements.</li> <li>Creating a program that uses the Switch, Case, and Break conditional structure to evaluate the conditions.</li> <li>Creating a program that uses nested conditional statements.</li> </ol>	
<b>Competency 4:</b> demonstrate an understanding of loops	<ol> <li>Computer / Technology Usage</li> <li>Information Literacy</li> </ol>
<ol> <li>Creating programs that use while, do- while and loops to create repetition.</li> <li>Analyzing existing programs with loops and determining the results.</li> <li>Creating programs that use nested loops.</li> </ol>	
<b>Competency 5:</b> demonstrate an understanding of mastery of functions	<ol> <li>Computer / Technology Usage</li> <li>Information Literacy</li> </ol>
<ol> <li>Creating functions that use call-by- reference and call-by-value.</li> <li>Modifying existing programs that use functions.</li> <li>Creating programs that include and use existing C++ Library functions.</li> <li>Creating a program that uses functions to</li> </ol>	

return values. 5. Identifying the scope of variables in functions.	
<b>Competency 6:</b> demonstrate an understanding of structured data types	<ol> <li>Computer / Technology Usage</li> <li>Information Literacy</li> </ol>
<ol> <li>Explaining the form and uses of array.</li> <li>Creating a program that uses single and multi-dimensioned arrays.</li> <li>Evaluating existing programs that search arrays.</li> </ol>	
<b>Competency 7:</b> demonstrate an understanding of structures	<ol> <li>Computer / Technology Usage</li> <li>Information Literacy</li> </ol>
<ol> <li>Defining the uses of structures.</li> <li>Writing a program that uses structures.</li> </ol>	
<b>Competency 8:</b> demonstrate an understanding of the input and output functions of a program	1. Computer / Technology Usage
<ol> <li>Writing a program that reads an existing sequential file.</li> <li>Writing a program that creates a sequential file.</li> <li>Writing a program that produces formatted printed output.</li> <li>Modifying a program that produces formatted printed output.</li> </ol>
