

Course Description

RTV2205C | Television Workshop | 3.00 credits

Production of TV shows from the script to the taping and the fully edited master. Includes post-production if required. This course combines learning outcomes from all previous production courses through professional-level productions. Prerequisite: TV2246C. May be repeated for credit.

Course Competencies

Competency 1: The student will demonstrate proficiency in industry standard video pre-production by:

1. Understanding and executing pre-production management and protocol.
2. Determining advanced studio lighting and audio schematics.
3. Analyzing and developing creative aspects of television production with crew members.

Competency 2: The student will demonstrate proficiency in industry-standard video production techniques by:

1. Defining crew positions and individual responsibilities for video production.
2. Implementing crew positions and on-set protocol in creating video productions.
3. Analyzing and critiquing camera, lighting, and sound technical choices.
4. Applying industry standard pre-visualization techniques

Competency 3: The student will demonstrate proficiency in post-production by:

1. Developing a workflow for editing video productions.
2. Utilizing editing techniques to complete video productions.
3. Integrating audio and color management techniques for completing video productions.
4. Analyzing and critiquing completed video productions.

Learning Outcomes:

1. Communication
2. Numbers / Data
3. Critical Thinking
4. Computer / Technology Usage
5. Aesthetic / Creative Activities
