APPENDIX D

General Placement Recommendations for Advisement

Tables 2-5 summarize the developmental education sequence for each subject area within selected meta-majors. Refer to Appendix E. The tables describe the standard sequences assuming students are successful in each course in the sequence. It is important to note that in all cases, students can complete the developmental education sequence and at least one college-level course within two (2) semesters.

Description of Specific Developmental Education Strategies and Related Advisement Recommendations

Modular Courses (MAT0057; REA 0056; ENC 0056)

Modularized instruction is customized and targeted to address specific skills gaps, based on an in-class course diagnostic. Some of the key features of MDC's modular courses include:

- a credentialed faculty member in the classroom at all times with regular office hours every week to provide additional assistance
- selected video vignettes, each presented by a member of the faculty
- guided instruction using small groups to support computer learning

Students who choose to take modular courses:

- must have basic knowledge of computers and be comfortable learning with an on-line program
- need reliable access to computers outside the classroom (at home, at the library, in a lab, etc.)

Modular courses are recommended for students requiring remediation in various subject areas, as well as for students who may be taking a compressed course in another area.

Students who complete a modular course prior to the end of the scheduled term can enroll in a subsequent course in sequence with departmental approval if such course is offered during one of the mini-terms within the major semester.

Compressed Course Structures (REA 0007; REA 0017; ENC 0015; ENC 0025)

Compressed course structures provide accelerated student progression from developmental instruction to college-level coursework, typically in one semester. Faculty incorporate time management and study skills during the early stages of the course. The compressed structure provides more faculty/student contact time per day, and typically for a minimum of 4 course sessions per week.

Students who choose to take accelerated courses:

- should not take more than one accelerated course per 8 week term, but can take back to back accelerated courses within a semester
- must have access to course materials in the first week of the term
- need reliable transportation to campus to attend course every day
- should not work fulltime outside of college
- should complete the basic skills boot camp (Shark Academy) prior to enrollment

Co-requisite Developmental Instruction (MAT 0029/MGF1131 (formerly MGF 1106)

Students in the Mathematical Thinking in Context (Non-Algebra) or Statistical Reasoning pathways can take advantage of the Math-to-Stats track that allows them to complete a college-level mathematics course, MGF1106 while receiving remediation through co-enrollment in MAT 0029. Students will then be able to complete their final mathematics requirement (MGF1107 or STA 2023, depending on their program of study) during their second semester. This co-requisite pathway incorporates group work and student presentations as an integral part of the classroom activities.

Students who choose to enroll in Math-to-Stats:

- must have selected one of the following meta-majors: (a) Arts, Humanities, Communication and Design; (c) Education; (f) Public Safety; (h) Social and Behavioral Sciences and Human Services. Refer to Table 3.
- must verify that their selected program of study at MDC does not require algebra
- must verify that their selected transfer institution does not require algebra

STUDENTS whose AA degree program of study does NOT require algebra (humanities, communications, social sciences other than psychology, hospitality, criminal justice, etc.) should be encouraged to take the **MATH-TO-STATS OPTION**.

MATHEMATICS PATHWAYS STARTING FALL 2024

To facilitate seamless transfer of credits, reduce excess credit hours, and ensure students take the courses needed for their future careers, section 1007.23(3), Florida Statutes, requires the statewide articulation agreement to establish three mathematics pathways for students by aligning mathematics courses to programs, meta-majors, and careers.

1. ALGEBRA THROUGH CALCULUS PATHWAY | Gateway Course(s): MAC 1105

- Students in the Algebra through Calculus pathway must be advised to enroll in coursework that includes the following student learning outcomes.
- Demonstrate the knowledge of various algebraic relationships and their application.
- Employ computational techniques to mathematical problem solving.
- Execute appropriate mathematical modeling techniques for solving application problems and interpret results of solutions.
- Develop graphical models using algebraic and problem-solving techniques.
- Articulate a working knowledge of various functions and their application, as appropriate.

2. STATISTICAL REASONING | Gateway Course(s): MGF 1131 and STA2023

- Students in the Statistical Reasoning pathway must be advised to enroll in coursework that includes the following student learning outcomes.
- Analyze data using graphical and numerical methods to study patterns and departures from patterns, using appropriate technology as needed.
- Critically evaluate a data-collection plan to answer a given research question.
- Use probability concepts and simulation.
- Use statistical models to draw conclusions from data.
- Perform correlation and regression analyses.
- Apply statistical reasoning and data analysis to real-world or major-specific examples.

3. MATHEMATICAL THINKING IN CONTEXT | Gateway Course(s): MGF 1130 and MGF 1131

- Students in the Mathematical Thinking in Context pathway must be advised to enroll in coursework that includes the following student learning outcomes.
- Determine efficient means of solving a problem through investigation of multiple mathematical models.
- Apply logic in contextual situations to formulate and determine the validity of logical statements using a variety of methods.
- Apply mathematical concepts visually and contextually to represent, interpret and reason about geometric figures.
- Apply mathematical models to civically contextual situations (e.g., stocks, finance, voting, population dynamics, etc.).
- Recognize the characteristics of numbers and utilize numbers along with their operations appropriately in context.
- Organize, visualize and model data in a meaningful way.
- Analyze and interpret representations of data to draw reasonable conclusions.
- Engage in ways of thinking that may involve sample size, counting strategies, chance, ratios and proportions.

APPENDIX D (continued)

PATHWAY RECOMMENDATIONS

ALGEBRA PATHWAY: This pathway is recommended for majors that require college algebra. The first course in this pathway is MAC1105. The second course is dependent upon the major.

It could be STA2023, MAC2233, MAC1147, etc....

STATISTICS PATHWAY: This pathway is recommended for majors that require statistics without college algebra. We recommend MGF1131 as the first course in this pathway, followed by STA2023.

MATHEMATICAL THINKING (NON-ALGEBRA) PATHWAY: This pathway is recommended for majors that do not require college algebra or statistics. The first course that we recommend in this pathway is MGF1130 (Mathematical Thinking), followed by MGF1131 (Mathematics in Context).

Note: Starting Fall 2024, MGF1107 and MGF1106 will no longer be offered. Students' placement in first math course under the pathway may vary based on alternative placement criteria.

Alternative Placement Criteria for Exempt & Non-Exempt

PATHWAYS

ALGEBRA THROUGH CALCULUS

MAC 1105 (3C) and MAC 1105L (1C)
College Algebra & College Algebra Lab or MAC 1106 (Through placement)

MAC 1147 (5)
MAC1140(3C)&MAC1114(3C)

MAC 2311(5C)
Calculus and Analytical Geom. I

MAC 2312 (4C)
Calculus and Analytical Geom. II

MAC 2312 (4C)
Calculus and Analytical Geom. III

STATISTICAL REASONING

MGF 1131 (3C)
Mathematics in Context

STA2023(3C)
Statistical Methods

MAC 2233
Business Calculus
Pre-requisite: MAC 1105

MAC 2103 (3C)
Elementary Linear Algebra
Pre-requisite: MAC 2311

MATHEMATICAL THINKING

MGF 1130 (3C)
Mathematical Thinking

MGF 1131 (3C)
Mathematics in Context

MAD 2104 (3C)
Discrete Math
Pre-requisite: MAC 1140 or MAC1106

MAP 2302 (3C)
Intro to Differential Equations
Pre-requisite: MAC 2312
